

More and more residents are storing water at their homes. Find out why!

Water Storage and Purification Why? What? Where? How?

Sponsored by MPC Ready: Helping to Build GREAT neighborhoods,
block by block. www.mpcready.org

Saturday, March 25, 2023, 9-10:30 a.m.

**Trinity Hall, Trinity Church,
330 Ravenswood Ave, Menlo Park**

Presenters and topics:

Erika Bailey, [family preparedness specialist](#), and John Yegge, “The Ready Guy” [preparedness consultant](#), will present an overview on developing a family/household Disaster Water Plan.

Talk will include:

- Water storage and purification methods.
- Other neighbors will be on hand to answer questions.
- Complimentary breakfast snacks and beverages offered.

About MPC Ready

The Menlo Park Community (MPC) Ready organization’s mission is to work collaboratively to help build disaster prepared, and climate-change ready, neighborhoods through advocacy, education and training, resources, organization and support.

In our area, we expect to have clean water at our disposal! However, during natural disasters, these services can be disrupted or compromised, causing the water supply to become contaminated or undeliverable. The importance of proper water storage for emergencies and disasters can sometimes be the difference between life and death.

The event is free and open to everyone interested in learning more about our water system, its limitations after a disaster and how residents can get prepared.

Please RSVP to Lynne Bramlett at lynne@mpcready.org
